Education

University of Wollongong — Dubai, UAE
Bachelor of Computer Science, Major in Big Data & AI | High Distinction — *Sep. 2024 – Apr. 2027*

- Dean's Merit List (2025)

GEMS Our Own Indian School — Dubai, UAE
CBSE Class XII | 95.8% — *Apr. 2023 – Apr. 2024*

- AISSCE Merit Award (2024)

Projects

Tesseract – Multi-Source RAG Chatbot | *Python, LangGraph, FastAPI, Weaviate, Docker* | — Nov. 2026

- Built a retrieval-augmented generation (RAG) chatbot over a screenplay, a physics textbook and 41K viewer comments, with an agentic LangGraph router that picks the right source for 92% of questions.
- Raised retrieval hit@5 from 57% to 83% using structure-aware chunking, hybrid search (BM25 + vector embeddings) and cross-encoder reranking, validated against a 106-question golden evaluation set.
- Built an LLM-as-a-judge evaluation harness and used it to raise answer correctness from 51% to 63% and faithfulness from 95% to 100%.
- Shipped as a streaming FastAPI + React app with local LLM inference, Docker Compose, GitHub Actions CI/CD and 163 automated tests.

Internly – Full-Stack Internship Portal | *TypeScript, Node.js, PostgreSQL, LLMs* | — Oct. 2026

- Rebuilt a university internship portal as a full-stack TypeScript monorepo where students search and apply for roles and companies post listings and review applicants.
- Built an AI CV matcher that ranks internships with a deterministic skill-overlap score computed in code, then streams LLM-generated explanations over Server-Sent Events behind a timeout and an offline fallback.
- Replaced v1's single shared session with per-user httpOnly cookie sessions, CSRF origin checks, owner-scoped queries and zod validation; 55 tests (38 API integration tests on a real PostgreSQL) run in GitHub Actions CI.

Weather Data – ETL Pipeline | *Python, Apache Airflow, PostgreSQL, Docker, Metabase* | — Aug. 2025

- Built a Dockerized ETL pipeline that pulls weather data from public REST APIs, transforms it with Python and loads it into PostgreSQL on a daily Apache Airflow schedule, with Metabase dashboards for trend analysis.

Experience

Growth Intern — Nov. 2025 – Jan. 2026
Tern Rewards — *Dubai, UAE*

- Drove early-stage user acquisition in a 5-member startup, running in-person outreach to 20–30 prospects (about 1 in 10 onboarded) and feeding user feedback into product iteration.

Technical Skills

Languages: Python, SQL, HTML/CSS; familiar with JavaScript, TypeScript, R, C++
AI & Data: LangGraph, Ollama, Weaviate, FAISS, pandas, NumPy, spaCy, Apache Airflow
Backend & Tools: FastAPI, Node.js, Express, PostgreSQL, Docker, GitHub Actions, Git; familiar with React
Relevant Coursework: Data Structures & Algorithms, Foundations of AI, Modern AI, Natural Language Processing, Big Data Management, Advanced Database Management, Advanced Programming, Project Management

Certifications

Intermediate Data Engineering | AWS & DeepLearning.AI — Aug. 2025
